

**Assignment No: 01**  
**Basic python programming**

**1. Write a python program to find the largest number in an given array**

**Code:**

```
import array as arr

#input values
input_num = arr.array('i',[])
number = int(input("Enter the number of elements in the array : "))
for i in range(number):
    x = int(input("Enter the next number : "))
    input_num.append(x)

# display
print ('Largest number in the array is : ', max(input_num))
```

**Output:**

```
Enter the number of elements in the array : 8
Enter the next number : 12
Enter the next number : 18
Enter the next number : 16
Enter the next number : 28
Enter the next number : 88
Enter the next number : 48
Enter the next number : 68
Enter the next number : 42
Largest number in the array is : 88
```

**Conclusion:** We have successfully written a python program to find the largest number in a given array
